

Entrust Certificate Services™

Security Beyond the Certificate

Digital certificates serve as the foundation for identity verification and secure digital transactions. Managing digital certificates and optimizing them for security can be simplified with the right toolset.

Entrust Certificate Services takes the guesswork out of certificate lifecycle management and is available as a value-add to all customers who purchase digital certificates from Entrust Datacard. Accessible from any web browser, our intuitive dashboard delivers critical insights in real-time and reports on actionable activity so that you can avoid security lapses and stay in compliance. Now all of your digital certificates, regardless of issuing Certification Authority (CA), can be centralized to a fully configurable dashboard with robust reporting and alerts making it even easier to deploy, audit and manage all of your digital certificates.

Business Challenge

Certificate lifecycle management should not be difficult. And yet, today's Enterprise and SMB IT personnel often find themselves struggling with a lack of centralization, ineffective reporting, increasing vulnerabilities, security lapses, application downtime and more.

If you find you have been pushed aside by other CAs or need a trusted advisor, centralized certificate management, and a cost-effective solution, Entrust offers a version of our Certificate Services platform to meet those needs.

Entrust Cloud Key Features

- One-to-One Relationship¹
- Industry recognized Technical Support
- More uptime
- Reduce business disruption
- Ensure Compliance
- Brand Protection
- Visibility to mitigate security risks and outside threats
- Avoid security lapses
- Effective budget planning
- Improves productivity
- Eliminates error-prone manual processes
- Easy renewal
- Centralized SSL Certificate management for Entrust and Non-Entrust Certificates

¹ Applies to Entrust Enterprise Customers

SSL/TLS Digital Certificates

Includes unlimited server licensing, unlimited reissues, a website security bundle and the latest encryption technology all from a trusted CA.

- **EV Multi-domain SSL Certificates** — provides the highest trust indicators available, making them a great choice for website owners who need to secure two domains.
- **Advantage SSL Certificates** — offers a great option for website owners who want to secure two domains for one low price.
- **Standard SSL Certificates** — delivers cost-effective website encryption, identification and authentication for one domain.
- **UC Multi-domain SSL Certificates** — secures multiple domains on one certificate. Also known as SANs certificates.
- **Wildcard SSL Certificates** — secures one domain and an unlimited number of subdomains across an unlimited number of servers with unlimited certificate duplication.
- **Private SSL Certificates** — secures non-fully qualified domain names (non-FQDNs), and eliminates the cost of running and maintaining an internal CA.

Full Line of Digital Certificates

- **Document Signing Certificates** — enables organizations to digitally sign Adobe® and Microsoft Office® documents. Verifies the publisher's identity, the document's authenticity and shows that the document was not altered.
- **Code Signing Certificates** — allows users to authenticate the source and verify the content integrity of code that is downloaded from the Internet. Provides assurance that customers are installing code or applications as they were intended.
- **Entrust Secure Email Certificates** — enables individuals or organizations to encrypt and digitally sign emails and other documents with Publicly trusted S/MIME certificates.
- **Entrust Mobile Device Certificates** — allows organizations to continue to deploy SSL certificates to non-fully qualified domain names with non-publicly trusted SSL certificates.

Expanded Offerings (additional fees apply)

- **Platinum Support** — 24x7 support and automated SSL Server Testing
- **Discovery** — consolidates all Entrust and Non-Entrust certificates into a single, centralized dashboard making it easier to audit and manage all of your digital certificates regardless of issuing CA

About Entrust Datacard

Consumers, citizens and employees increasingly expect anywhere-anytime experiences — whether they are making purchases, crossing borders, accessing e-gov services or logging onto corporate networks. Entrust Datacard offers the trusted identity and secure transaction technologies that make those experiences reliable and secure. Solutions range from the physical world of financial cards, passports and ID cards to the digital realm of authentication, certificates and secure communications. With more than 2,000 Entrust Datacard colleagues around the world, and a network of strong global partners, the company serves customers in 150 countries worldwide.
