

DATACARD® CD820™ INSTANT ISSUANCE SYSTEM

MAKE AN INSTANT IMPACT, DRIVE REVENUE

Increase customer loyalty, improve card activation rates and create cross-selling opportunities with the CD820 instant issuance system. Developed specifically for financial instant issuance, this system is an affordable solution for financial and retail organizations.

Use this powerful system to reduce issuance costs and deliver cards the way customers want — customized, personalized, secure and on demand.

Affordable, Powerful Instant Issuance

The Datacard® CD820™ Instant Issuance System empowers banks and retailers to issue secure, flat financial cards — affordably and instantly. With this reliable and compact desktop solution, organizations can capture more business by putting personalized, activated debit and credit cards in customers' hands at bank branch or store locations. Full-color or monochrome direct-to-card printing is offered along with magnetic stripe encoding, and contact or contactless smart card encoding. It also meets VISA and MasterCard instant issuance security guidelines.

Instant purchasing power. When integrated with Datacard® CardWizard® instant issuance software, issuers can print ready-to-use debit and credit cards with activated PIN numbers in minutes — giving consumers instant purchasing power. CardWizard software is installed in more than 7,500 financial and retail locations worldwide.

Strong program security. User-selectable encoding and built-in card auditing features reduce the risk of fraud. AES-256 encryption protects magnetic stripe data from unauthorized interception during network transmission. A hardware lock suite secures the printer and supplies.

Versatile printing. Flat pre-printed cards can be personalized with monochrome printing to enhance cardholder satisfaction and drive card use. Or choose full-color printing that creates edge-to-edge coverage and adds high quality graphics such as images and headshots.

Flexible configurations. Create the ideal system with optional features such as smart card encoding and a six-compartment multi-hopper input.

Datacard®

DATACARD® CD820™ INSTANT ISSUANCE SYSTEM

- Direct-to-card printing
- Magnetic stripe and single wire contact/contactless smart card encoding
- Convenient front-facing input and output hopper
